Anastasia Chernysheva
Department of History
810 S. Wright
M/C 466

Dear Anastasia Chernysheva:

The George A. Miller Committee was very enthusiastic about your proposal to bring Professor David Rosenboom to campus for an extended stay during October 2022. We especially commend your inclusion of so many disparate units on Professor Rosenboom's schedule. That said, the committee encourages you to be sure that our Science & Technology Studies faculty and graduate students on this campus are aware of the wonderful opportunities for interaction this residency offers. With no formal STS unit on campus, this is of course challenging: CAS Deputy Director Masumi Iriye would be happy to assist you with this. She will also help expand your cosponsor list to include STS units (such as the iSchool) as well as other departments such as Physics.

The GAM Committee would also like to extend an invitation to Professor Rosenboom to give a presentation in the MillerComm series of public events. If he is amenable, please send us a provisional title and brief description of this event so that we can add this to the MillerComm events calendar. Please keep in mind that the MillerComm talk should be addressed to an audience of educated but non-specialist members of our on- and off-campus audiences. Please be sure to mention Professor Rosenboom's endowment title in all public references to this campus visit:

Title: **George A. Miller Visiting Professor**
Amount of Support: \$4,700

Please have someone from your office contact Rita Conerly at 3-6729 to make the necessary arrangements for reimbursing your unit for expenses related to this visit. All funds must be accessed before the end of FY23. The Center will reimburse direct speaker costs but will not pay toward the cost of entertainment such as receptions or invited luncheons..

Sincerely,

Tamara Chaplin
Chair, George A. Miller Programs Committee
